Guidelines for the case study

Becoming a be-BOP reseller in a country of your choice

1. Local Context Analysis (PESTEL)

Task:

- Analyze your chosen country using the six dimensions of the PESTEL framework:
 - **Political:** Stability, Bitcoin regulations
 - **Economic:** Living standards, internet usage
 - **Sociocultural:** Bitcoin acceptance, buying habits
 - **Technological:** Infrastructure, fintech adoption
 - **Environmental:** Ecological concerns, Bitcoin perception
 - **Legal:** Legal framework, data protection laws
- Use reliable and country-specific data.

2. Value Proposition

Task:

- Clearly define what be-BOP will bring to the local market.
- Explain how the solution meets the specific needs of creators, communities, and small businesses in the country.
- Highlight key benefits: ease of use, security, cost reduction, new use cases.

3. Go-to-Market Strategy

Task:

- Identify priority customer segments (e.g., creators, SMEs, NGOs).
- Propose marketing and distribution channels suited to the country.
- Present a communication plan to educate and attract users.
- Include a pilot phase to validate the offer.

4. Business Model

Task:

- Explain how you will generate revenue locally, including:
 - Installation, customization, and integration fees for clients.
 - Monthly or annual subscriptions for support, maintenance, and updates.
 - Sales of training sessions and workshops for end users.
 - Other services or source of revenue ?

16.05.2025

- **Specifically for be-BOP International**, detail how the parent company will earn revenue from local activities:
- Provide an estimate of profitability considering local fixed and variable costs.

5. Setup & Installation Services

Task:

- Describe the steps to integrate be-BOP for clients (needs assessment, technical installation, testing).
- Include support for local legal compliance.

6. Training & Support

Task:

- Propose a training plan for clients (formats, content).
- Explain how customer support will be provided (channels, availability).
- Include ideas for documentation and educational resources.

7. Custom Features or Integrations

Task:

- Identify necessary adaptations to the be-BOP solution for the local market (language, currency, local platforms).
- Suggest useful technical integrations for the country.

8. Pricing Strategy

Task:

- Develop a clear pricing policy tailored to customer segments.
- Plan promotional offers for the launch phase.
- Ensure transparency regarding fees and terms.

9. Discussion

16.05.2025

Task:

- Analyze strengths and opportunities for the project in the country.
- Identify potential risks and challenges.
- Propose solutions to overcome these challenges.
- Evaluate the expected social, economic, and technological impact.

10. Conclusion

Task:

- Summarize the relevance of launching be-BOP in the chosen country.
- Highlight growth potential and benefits for users.
- End with a call to action (e.g., support, investment).

General Advice:

- Support your analysis with credible and recent sources.
- Illustrate with concrete local examples.
- Write clearly, structured, and professionally.
- Use visuals (charts, tables, quotes) to enhance your presentation.
