

Plan B Network – Case Study (Bitshala)

Company: Bitshala

Business Area: Bitcoin Education, Open Source Contributor Onboarding, Community Building, FOSS Advocacy, Movement Design

Case Study Description:

Bitshala is India's grassroots movement to onboard and empower the next generation of Bitcoin contributors. From developer summits to study cohorts, open-source curriculum to fellowships/grants, Bitshala offers a vibrant ecosystem for aspiring developers, designers, researchers, and builders to start contributing to the Bitcoin ecosystem.

We want Bitshala to become the **default pathway** for anyone in India seeking to learn and contribute to Bitcoin.

This case study challenges students to create a **ground-breaking outreach strategy**, optimize the experience funnel, and refine Bitshala's digital presence to drive conversions - from curiosity to contribution.

Objectives:

1. Funnel Design & Optimization

- Design a complete funnel from awareness to open-source contribution
- Identify bottlenecks at each stage and propose fixes
- Recommend funnel tracking metrics and incentives to reduce drop-offs

2. Marketing & Outreach Strategy

- Identify the highest-impact marketing and community channels across India
- Recommend specific campaigns, messaging, and content formats that resonate with students, tech workers, and FOSS enthusiasts
- Propose balance between digital and in-person outreach (e.g., meetups, clubs, partnerships)

3. Website & Brand Audit

- Conduct peer research on Bitshala's website (bitshala.org)
 - Evaluate clarity of message, call-to-action, visual hierarchy, and searchability
 - Suggest copy/design/CTA improvements to increase conversion and recall
-

Required Information:

 Website: <https://bitshala.org>

 Summary:

Bitshala is an open-source movement to nurture new Bitcoin contributors in India. Through study cohorts, fellowships, clubs, dev summits, and mentoring, it enables hands-on learning and real-world contribution across the Bitcoin stack. Bitshala emphasizes inclusion beyond developers — welcoming designers, documenters, product thinkers, and researchers.

Mentor Contact:

Name: Saurabh (Operations Lead, Bitshala)

Email: saurabh@bitshala.org

Signal: @sorv.21

(Open to intro calls or Q&A for Biz School teams)

Additional Notes:

Students are encouraged to conduct peer research on:

- How clearly Bitshala's website communicates its purpose

- Whether the calls-to-action are obvious and effective
- How discoverable the brand is via search, social media, or referrals
- Which formats (text, image, video, shortform, longform) they personally engage with
- What factors would convince them or their peers to sign up for a club, cohort, or grant

Also explore:

- Which platforms Bitshala should prioritize (Twitter, LinkedIn, YouTube, Nostr, Instagram, etc.)
- How to seed Bitshala content in universities, OSS events, adjacent tech meetups like web3 / crypto
- What a high-retention engagement loop might look like

Example Use Cases or Scenarios:

- A 2nd-year engineering student in Pune sees a viral video on “Bitcoin as open-source career,” visits Bitshala.org, signs up for a local cohort, joins Bitshala Pune club, and contributes to Bitcoin Core docs.
- A product manager from Bangalore comes across Bitshala via a LinkedIn thread and joins the TradFi x Bitcoin club to explore Bitcoin-backed bond products.
- A UX designer finds out about Bitshala design fellowship from Bitcoin Design and joins Bitshala Discord to find more opportunities
- A software engineer at an AI residency (like Turing or Multimodal) stumbles upon Bitshala through a casual event in Goa, joins a Rust club, and starts contributing to LDK.
- A CS undergrad looking for internships applies for a fellowship / grant, gets mentored for 6 months, and lands a full-time Bitcoin job post-graduation.
