

Galoy Case Study Brief – Plan B Biz School 2025

Project Title

Market Analysis: Bitcoin Readiness of Modern Core Banking Platforms

Background

Galoy builds bitcoin-native core banking software that enables existing and new (“de novo”) financial institutions to launch modern, bitcoin-enabled financial products. As banks migrate to cloud-native cores, understanding their capacity to support bitcoin and digital assets is critical.

Assignment Objective

Deliver actionable market intelligence that ranks leading modern core banking vendors by their readiness to integrate bitcoin services and recommends how Galoy should position itself.

Key Questions

1. Which core platforms dominate the modern SaaS banking market?
2. For each, what is the current status of bitcoin/digital-asset functionality?
 - Native capability (custody, on-chain settlement, Lightning)
 - Road-map commitments
 - Third-party integrations/marketplace partners
3. What technical, regulatory, and business hurdles remain?
4. Where does Galoy’s open-source stack fit in this landscape?
5. Strategic next steps for Galoy (partner, embed, compete?).

Suggested Methodology

- **Desk research** – product docs, developer portals, earnings calls, conference talks.
- **Optional interviews** – reach out to product managers/dev-rel via LinkedIn/X.
- **Comparative scoring matrix** – 0-5 scale across: custody, Lightning, compliance tool-chain, integration ease, go-to-market posture.
- **SWOT** – Galoy vs. top three vendors.

Core Platforms to Consider (non-exhaustive)

Thought Machine, Temenos Transact Infinity, FIS Modern Banking Platform, Finxact, Mambu, 10x Banking, Jack Henry Symitar Cloud, Finastra Essence, Nymbus, Modularbank, and any others discovered.

Deliverables

- Slide deck **or** written report (PDF)
- 1-page executive summary
- Comparative scoring spreadsheet/matrix

Evaluation Criteria

- Depth & accuracy of research
- Clarity of comparative analysis
- Actionability of recommendations
- Professional presentation quality

Timeline & Expectations

- **Brief released:** 26 May 2025
- **Kickoff call with mentor (Andrew Begin, Galoy):** 2 June 10:00–13:00 CET
- **Work period:** 3 – 18 June ($\approx$ 25 hours)
- **Submission deadline:** 18 June 23:59 CET
- **Review & grading:** 18 – 23 June

Resources Provided

- Galoy & Lana public docs + API reference
- Previous Galoy market landscape reports
- Recommended reading list (BIS, IMF digital-asset notes)
