

Plan B Network Biz School 2025 Case Study:

Company name: Plan B Network

Pitch Your Startup!

In collaboration with [Plan B VC Fund](#), we are looking for the most innovative and impactful startup ideas. This is your opportunity to pitch a project and demonstrate your entrepreneurial vision.

Objective & Theme

Participants are expected to develop a realistic and original startup idea that includes a strong market analysis, basic financial projections, and a convincing elevator pitch.

The project must focus on one of the following strategic areas: Bitcoin on-chain solutions, Layer 2 technologies, peer-to-peer systems, or emerging market innovations. The goal is to present a concept that is both visionary and executable, aligning with the future of finance and technology.

Deliverables

1. A 60-second elevator pitch delivered to the judging panel
2. A 15-minute discussion to defend and explain your project
3. (Recommended) Supporting documents, such as:
 - o Business plan
 - o Market analysis
 - o Branding materials
 - o Any additional materials to strengthen your case

Judging & Evaluation

Projects will be judged on their originality, feasibility, and the passion behind them. The use of AI tools is highly recommended to assist in research, strategy, and development. However, core ideas must come from you—AI should support your work, not replace your creativity.

If AI generates your idea, you've already failed.

We're looking for real entrepreneurial spirit, boldness, and excitement.

The main judge for this case study is Rogzy, Plan B Network co-founder.

Opportunities for the Future

The top project may be selected to pitch live in front of the PlanB VC Fund.
This could open the door to real investment, mentorship, and potential long-term collaboration within the Plan B ecosystem.
