

Plan B Biz School - Bitcoin District Case Study

Building a Bitcoin District in a startup city: Market Analysis and Strategy

Primary Focus: Economic development through Bitcoin adoption, startup relocation, and libertarian governance innovation

Key Areas: Business registration, adoption of Bitcoin, decentralized governance, community building, sovereignty and quality of life enhancement.

This case is ideal for:

- 🧠 Strategic thinkers
- 🌐 Globally-minded entrepreneurs
- 👤 Legal-regulatory minds
- 🏢 Business developers
- 💡 Ecosystem designers & community builders

▼ 📖 Background:

Bitcoin District Próspera (BD) is a visionary initiative to build a Bitcoin-first jurisdiction within the Próspera ZEDE, a special economic zone (startup city) on Roatán Island, Honduras.

Launched in 2020, Próspera offers a unique foundation:

- Governance-as-a-Service operating model
- Low taxes: 1% business revenue, 5% personal income, 2.5% sales tax
- Special economic zone with strong legal warranties and political stability
- Flexible regulations and private arbitration
- Libertarian approach and inspiration
- Bitcoin adopted as legal tender (2022) and a unit of account (2024)

Próspera is currently the only jurisdiction in the world with Bitcoin as an official unit of account

BD aims to become a magnet for Bitcoin startups, professionals, and enthusiasts by fostering a vibrant ecosystem for Bitcoin-based commerce, governance services, and high-quality living. However, challenges include low density of economic activity in the city, lack of awareness among bitcoiners, global competition, and the chicken-egg adoption problem of such initiative.

The challenge: Design the market strategy and policy blueprint to make Bitcoin District Próspera the

jurisdiction of choice for Bitcoiners.

▼ 🏠 Case Study Description

Bitcoin District Prospera is a bold initiative to establish a Layer 2 jurisdiction—built on top of the Prospera ZEDE—specifically designed to attract Bitcoin-native businesses and communities. But what does the ideal Bitcoin jurisdiction actually look like?

This is a market analysis and strategy assignment, that challenges students to explore:

- What makes jurisdictions attractive to Bitcoin companies?
- What do founders and startups in the Bitcoin space actually need from a legal, tax, and infrastructure perspective?
- How can Bitcoin District Prospera strategically position itself as the global hub for sovereign finance and BTC-based innovation?
- What Bitcoin District Próspera should build to stand out globally and attract Bitcoin oriented individuals and businesses?

▼ 🎯 Objectives

Develop a strategic plan to position Bitcoin District Próspera as a top destination for Bitcoin people, startups and businesses.

Your case study should include:

- **Market Analysis:** Identify key factors attracting Bitcoin people and startups to jurisdictions (e.g., low taxes, privacy laws, regulatory clarity, network access, infrastructure).
- **Benchmarking:** Compare Próspera with other attractive jurisdictions, like Dubai DMCC Free Zone, Delaware, Cayman Islands or El Salvador. Highlight BDP's unique governance model, identify strategic gaps and underused strengths.
- **Strategic Plan:** Propose actionable strategies that in the long term will attract Bitcoin entrepreneurs, startups and digital nomads to register, operate or even live within Próspera. Propose services, tools, onboarding, incentives, and messaging

Deliverables & methodology: open format, laissez faire

▼ 🔑 Key considerations

- Read about charter cities concept, startup cities, network states
- What can BDP offer that El Salvador or Dubai cannot?
- In what unique way can Bitcoin be used in this project?
- What could be the business offer - a service provided by Bitcoin District?
 - Please remember that BD aims to be a sustainable and profitable venture - not a non-profit financed by sponsors. But with a clear mission of driving Bitcoin's adoption.
 - Take a look at business concierge agencies or platforms like <https://www.firstbase.io/> that build business network and provide adjacent services (banking, accounting, etc.) for their members

Available for live calls and async support

This is a real-world, greenfield challenge—**Bitcoin District Próspera is real and launching**. Everyone is welcome to work with a live jurisdiction project in early stages and help define its roadmap.

We're inviting visionary students who understand strategy, ecosystem design, and the unique values of Bitcoin culture.

Standout students may be invited to future contributor calls or long-term collaborations.

Thank you!
